1 Information about this notebook

This is an exploratory analysis of the data in the project. We are investigating the number of samples per Sex. This is a demo designed for the purposes of the Best practices training in the context of the Automation and Reproducibility in Computational Biology course.

2 Set up

```
suppressPackageStartupMessages({
  library(tidyverse)
})
```

3 Directories and paths to file Inputs/Outputs

```
attach(params)
